

Sub D2

26. (Amended) A powder coating composition which comprises two or more color powder coatings wherein the color of each powder coating is different, a difference in triboelectric charge of said two or more powder coatings is $5.0 \mu\text{C/g}$ or less; wherein particles of each powder coating are not agglomerated, and wherein said two or more powder coatings form a single layered coating film having a homogeneous hue.

C2

Sub E1

37. (Amended) A powder coating composition, comprising two or more color powder coatings, each of said two or more powder coatings comprising:

a resin; and

at least one colorant, wherein

C3

(1) each of said two or more color powder coatings has a different color,

(2) a difference in triboelectric charge of said two or more color powder coatings is $5.0 \mu\text{C/g}$ or less,

(3) the particles of each color powder coating are not agglomerated, and

(4) said powder coating composition forms a single layered coating film having a visually homogeneous hue.
